VERY IMPORTANT PREPARATION

To ensure the self-adhesive hook & loop fastener stick to the plastic trim, you **MUST CLEAN** all grime from the plastic and **REMOVE** all **SILICONE** applied during manufacture and valeting.

To do this please:

1. Use a silicone remover, such as AutoGlym Intensive Tar Remover, and apply generously to the surface you want to adhere to.
2. Using a separate clean, dry cloth, thoroughly dry the surface until the cloth starts to drag. Attach one self-adhesive fastener tab to see if it sticks. (Repeat steps 1 and 2 if necessary.) Extra tabs have been provided.
3. Attach the self-adhesive fasteners and let them fully adhere over the next 24 hours for the best bond.

**The self-adhesive fasteners cannot be used once they have been in contact with silicone. Replacement kits are available on our website.*

STEP 1. PREPARATIONS

- Remove the load cover. It may be replaced later.
- Put the headrests in their highest position.

STEP 2. FITTING THE BASE

- Place the boot liner into the car boot with the Hatchbag logo at the seat end. Flatten the base so it fits snugly against the edges. The hook fasteners on the back side attach directly to the carpet. **(Image A)**

STEP 3. FITTING THE FRONT

- **PLUS / SPLIT VERSION ONLY** - Fasten the hook & loop fasteners between the side panels and the seat panel. **(Image B)**
- Starting with the middle headrest, fasten the hook & loop fastener straps around both headrest posts. **(Image C)**. Make sure to hold the front part of the base in position to avoid pulling the boot liner too far up. Repeat the procedure with the left and right headrests.

REAR PLUS VERSIONS

You **MUST** unfasten the hook & loop fasteners and the headrest straps before you recline the upper part of the rear seats. *(Please refer to REAR PLUS / SPLIT options on website to see detailed photo.)*
