

Ford Focus Hatch (inc. ST) 2005 - 2011 – our ref: H0393

SPACE SAVER SPARE WHEELS

We ask what type of spare wheel your vehicle has because it affects the size and shape of the Bootliner

Traditionally most vehicles USED to be supplied with a Steel or Aluminium Spare wheel that was the same size and style as those fitted to the vehicle for road use.

In the last few years there has been a move to supply vehicles with a smaller emergency spare wheel that is commonly known as a Spacesaver

It will normally have a yellow or red notice on it warning about a maximum speed when fitted (50 MPH / 80 Km/H)

STANDARD FULL SIZE
SPARE WHEEL

SPACESAVER WHEEL

Space Saver wheel has a narrow tread when compared to a Standard Full Size Wheel

These photos above are for illustration purposes only, they are nonspecific to your vehicle / wheels

**PLEASE BE AWARE THERE IS ALSO A FEW MODELS WITH
Poly Foam Insert + Space saver spare + Central Foam Booster**

There are vehicles that were designed for a Full sized spare wheel but were only fitted with a Space saver spare. To stop the floor sagging in the middle they were also fitted with a Central Foam Booster

Please lift up the boot floor and check. If there is just a shallow tray as shown in these two photos we cannot supply a Bootliner to suit.

Central Foam Booster

Poly Foam Inserts
