

Hyundai i10 - our ref.H0477

Your i10 may have the Under Floor Luggage Compartment feature.

If so the boot depth will be shallower than the standard boot.

We need to establish the boot shape

Please read carefully the notes for the two shapes and confirm both points apply.

Under Floor

WITH THE UNDER FLOOR COMPARTMENT

Lift the central section of the carpeted floor panel to expose a plastic storage tray.

When the rear seat uppers are folded down the floor and seats lie flush

No under Floor Compartment

NO UNDER FLOOR COMPARTMENT

Lift the central section of the carpeted floor panel to expose the spare wheel + metal body

When the rear seat uppers are folded down they sit higher than the boot floor.
