VERY IMPORTANT PREPARATION

To ensure the self-adhesive hook & loop fastener stick to the plastic trim, you **MUST CLEAN** all grime from the plastic and **REMOVE** all **SILICONE** applied during manufacture and valeting.

To do this please:

1. Use a silicone remover, such as AutoGlym Intensive Tar Remover, and apply generously to the surface you want to adhere to.
2. Using a separate clean, dry cloth, thoroughly dry the surface until the cloth starts to drag. Attach one self-adhesive fastener tab to see if it sticks. (Repeat steps 1 and 2 if necessary.) Extra tabs have been provided.
3. Attach the self-adhesive fasteners and let them fully adhere over the next 24 hours for the best bond.

**The self-adhesive fasteners cannot be used once they have been in contact with silicone. Replacement kits are available on our website.*

STEP 1. PREPARATIONS

- Remove the load cover. It may be replaced later.

STEP 2A. FITTING THE BASE 5 SEATER ONLY

- Fold the rear seats flat prior to placing the boot liner into the boot.
- Place the boot liner in the car boot with the Hatchbag logo at the seat end. Flatten the base so it fits snugly against the edges.
- Push the two foam-filled tabs sewn onto the front end of the base into the slot between the base and the rear seats. Lifting the seats a little may open up the gap. Be sure to keep the base straight. Fold the seats back up trapping the foam tabs. (Image A)
- Stick the 1 x 820 mm 50mm wide self-adhesive loop fastener onto the tailgate end of the boot. Attach the hook fastener strip sewn on the underside of the boot liner base to the loop fastener fixed in place previously. (Image B)

STEP 2B. FITTING THE BASE 7 SEATER ONLY

- Attach the 2 x 200mm, 50mm self-adhesive loop fasteners to the plastic panels on both sides of the boot floor as shown in (Image A1)
- Place the boot liner in the car boot with the Hatchbag logo at the seat end. Flatten the base so it fits snugly against the edges.
- Attach the hook fasteners welded onto the reverse side of the boot liner base to previously placed loop fasteners.
- Stick the 1 x 820 mm 50mm wide self-adhesive loop fastener onto the tailgate end of the boot. Attach the hook fastener strip sewn on the underside of the boot liner base to the loop fastener fixed in place previously. (Image B1)

STEP 3. FITTING THE FRONT

- **PLUS / SPLIT VERSION ONLY** - Fasten the hook & loop fasteners between the side panels and the seat panel. (Image C)
- Starting with the middle headrest, fasten the hook & loop fastener straps around both headrest posts. (Image D). Make sure to hold the front part of the base in position to avoid pulling the boot liner too far up. Repeat the procedure with the left and right headrests.

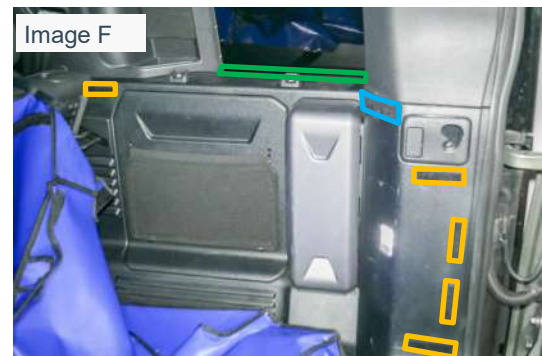

REAR PLUS VERSIONS

You **MUST** unfasten the hook & loop fasteners and the headrest straps before you recline the upper part of the rear seats. (Please refer to **REAR PLUS / SPLIT** options on website to see detailed photo.)

STEP 4. FITTING THE SIDES

- On both sides of the boot stick the following loop fasteners in line with the hook fasteners sewn & welded on the reverse side of the boot liner as highlighted on Image E & F.
 - Green 310mm 30mm loop fastener
 - Yellow 190mm 30mm loop fastener
 - Blue loop fastener tabs
- If necessary snip the self-adhesive fastener strips at the corners to ease around the curves.
