

## Load Cover Cassette **IN** or **OUT**?

*(Sometimes referred to as a Cargo cover too)*

### Load Cover Cassette identification

Very similar to a Roller Blind and normally located behind the rear passenger seats: The Cassette contains a cover that can be pulled across the load area to hide the contents.

**IN** - Holes are cut in the Bootliner to accommodate the relocation of the load cover

**OUT** - The Bootliner does NOT accommodate the relocation of the load cover

### Net Cassette identification

Normally located behind the rear passenger seats the LOAD SAFETY NET Cassette is very similar in construction to the Load Cover Cassette. It may even be fixed to the rear seat uppers.

*The Bootliner will NOT accommodate a net cassette if it prevents the front panel of the liner fixing to the head rest posts – refer to the fitting instructions for more guidance.*

*Please note these photos are non-specific to your model – they are purely for guidance!*
