

## SPACE SAVER SPARE WHEELS

*We ask what type of spare wheel your vehicle has because it affects the size and shape of the Bootliner*

Traditionally most vehicles USED to be supplied with a Steel or Aluminium Spare wheel that was the same size and style as those fitted to the vehicle for road use.

In the last few years there has been a move to supply vehicles with a smaller emergency spare wheel that is commonly known as a Spacesaver

It will normally have a yellow or red notice on it warning about a maximum speed when fitted (50 MPH / 80 Km/H)

STANDARD FULL SIZE  
SPARE WHEEL

SPACE SAVER WHEEL

Space Saver wheel has a narrow tread when compared to a Standard Full Size Wheel
