VERY IMPORTANT PREPARATION

To ensure the self-adhesive hook & loop fastener stick to the plastic trim, you MUST CLEAN all grime from the plastic and REMOVE all SILICONE applied during manufacture and valeting.

To do this please:

1. Use a silicone remover, such as AutoGlym Intensive Tar Remover, and apply generously to the surface you want to adhere to.
2. Using a separate clean, dry cloth, thoroughly dry the surface until the cloth starts to drag. Attach one self-adhesive fastener tab to see if it sticks. (Repeat steps 1 and 2 if necessary.) Extra tabs have been provided.
3. Attach the self-adhesive fasteners and let them fully adhere over the next 24 hours for the best bond.

**The self-adhesive fasteners cannot be used once they have been in contact with silicone. Replacement kits are available on our website.*

STEP 5D. BOOT LINER EXTENSION

The Boot liner extension provides superior protection for the rear seats when purchased with a REAR PLUS option.

- The Boot liner extension is designed to attach to a Rear Plus/Split version liner.
- It provides additional protection for the back of the front seats and the extended floor area when the rear seats are folded flat.
- It does not offer full protection to the rear doors
- Attach the Boot liner extension to the base of the main boot liner (Image 5)
- Detach the sides of the boot liner to expose the hook fasteners highlighted in blue on images G & H on page 3 and attach the extension to them.
- Fasten the two ties in the corner together (Orange arrows - Image 6)
- Fasten the hook & loop fastener straps around the headrest posts. (Blue arrows - Image 6)
- Repeat on opposite side
